

# 4TH GRADE NEWS #2

everyone in their online classes now

**We made it! Thank you to everyone for a great distance learning day. We made it through together.**

## **ENGLISH**

In English, we have been researching and reading about immigrant life, beginning with the Ellis Island process. We learned about Seymour, who was a child prodigy from Poland, and we learned about Annie Moore, who is noted as the first immigrant through Ellis Island. We will use our detective skills to compare and assess if her story is accurate or if the details have been altered over time.

In Spelling and Grammar we've been reviewing words ending in -ed.

## **SOCIAL STUDIES**

In Social Studies we have been learning about the ten stages of the Ellis Island immigration process. We drew floor plan maps, made guesses about room order and talked about what each of the "stations" might be called. In Technology, we have practiced a "virtual" immigration process to help prepare for our in class simulation.

## **MATH**

In math we have moved on from whole number place values to decimal place values. Numbers will always have a special "place" in our hearts. We love talking in "THS" to make sure we clarify our points. Now we are working through decimal operations like it is a secret mission. We will complete it soon and it will be mission accomplished! Next, we'll start learning about statistics as we work on graphs and charts.

## **REMINDERS**

- **NO SCHOOL on Sept. 28th (holiday).**
