

# 4th Grade Newsletter 7!

Thanksgiving: I would like to take a moment to thank both the parents and the students for such great work on the Thanksgiving play. The students performed so well and the costumes looked amazing. Thanks for your hard work and support!

## Math

This week in math we've been looking at squares, rectangles, and triangles. We have been working on perfecting our skills finding the area and perimeter of the shapes mentioned above. We've been practicing our multiplication, addition and division skills when using the different formulas.

## Science

In science we've been finishing up the digestive system parts and processes. We have talked about the order of the system and how each main body part and organ in the digestive system processes and helps digest food. Soon we will present our body systems projects. We can't wait to see what everyone has picked.

The 4th graders stole the show as Victorians.

## English

In English we have been working hard on our informative essays. We learned that informative/explanatory essays have to inform a person or audience about a specific topic and have headings to organize information. We are writing about different healthy and unhealthy food. We are using our personal knowledge, nutrition labels and what we have learned about food groups and nutrients in Science class to write our essays. We have also started comparing the book and movie versions of "Wonder" and discussing how and why it is different.

## Tech

In Tech we were making composite shapes so that we can find the area and perimeter of them in Math class.

We also had a challenge to draw a setting from Wonder in 15 minutes for classmates to guess.

### Reminders:

Christmas party 2:30-5pm Dec. 18th.

If you want to bring a toy donation for the hospital bring it by the 16th of Dec.
